

SOLATUBE®

Ventilation Solutions

Being **COOL** is a breeze.

Hot, stale air out.

Cool, fresh air in.

Ventilation solutions for every garage configuration.

You have many uses for your workspace. We have many ways to keep it cool and healthy.

Solar Roof-Mounted Fans

Solar roof-mounted fans are an ideal solution for garage and storage spaces with open ceilings, especially when the sun is beating down on your garage's roof and there's no insulation. The solar fan runs all day without adding cost, while keeping the entire space cool.

RM 1500

Powered Garage Fan

For garages with attic space above them, you want to keep both spaces cool, and the structure protected from elements. The powered garage fan features fire-rated damper doors, and a Comfort Control remote providing custom settings at your fingertips.

Comfort Control Remote

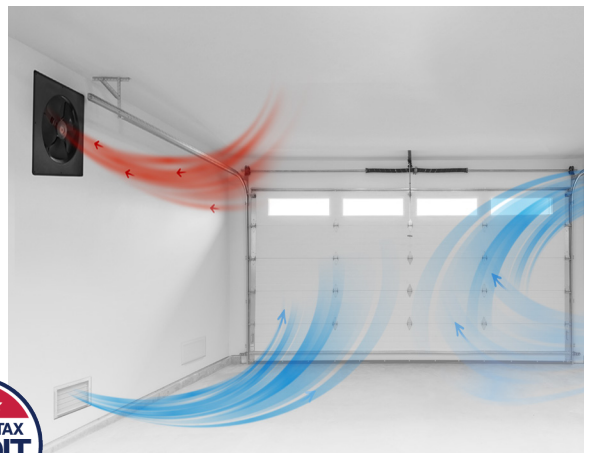

Fire Rated Damper Doors

Solar Interior-Mounted Fan

When you're as busy in the garage below as in the living space above it, a solar interior-mounted fan is a great solution to keep you comfortable. The solar panel sits discreetly on your roof to maintain your home's curb appeal.

IM 1500

At Solatube, we have the perfect solutions to remove heat and odors from garages, man caves, workshops, and outbuildings.

Whether you're working on your vehicle, your fitness, or your next great project, you want to stay cool & healthy.
